INSTRUCTIONS FOR USE OF XML

We are sharing as many as six separate files containing grouped information to ease the operations at our new XML. This approach optimizes work, i.e. thanks to a quick stock level checking option.

Access to XML

You can only browse the files after logging in to the website: https://jaguargift.com/.
The access token for a programmer is located at https://jaguargift.com/uzytkownicy/download/.

XML file languages

To download XML files in other languages available at https://jaguargift.com/, change the country code to the required one in the link to the XML file.
Examples:
For the PL language: https://jaguargift.com/pl/xml/stock_items/
For the EN language: https://jaguargift.com/en/xml/stock_items/
For the DE language: https://jaguargift.com/de/xml/stock_items/

Meaning of the product codes

There are two types of formats for products and services codes:
_xxx_yyy_zz
xxxx_yyy_zz

Explanation:
xxx or xxxx – is a model number
yyy – is a product's raw material
zz – is a product's color

Products in stock

https://jaguargift.com/en/xml/stock_items/
The /stock_items/ file contains information about products immediately available in stock.
The list of images was divided into two groups: <color_image> with a product image in color compatible with the product's 'zz' code, and a list of <images> showing this product in different shots

and colors. The file /stock_items/ contains a list of associated marking and modification codes, information about which is included in files: /marking/ and /modifications/.

LIST OF ALL /stock_items/ FILE UNITS
<name>**Product name**</name>
<code>**Product code including color number**</code>
color_image>**Product image compatible with the color code<**color_image>
<images><list-item>**List of product images in different shots and colors**</list-item></images>
<price_pln>**Price in PLN**</price_pln>
<price_eur>**Price in EUR**</price_eur>
<hs_code>**Product customs code**</hs_code>
<size>**Product size**</size>
<minimal_order>**Minimal order**</minimal_order>
<materials>**Product material**</materials>
<features><list-item>**List of product features**</list-item></features>
<categories><list-item>**List of categories to which the product belongs**</list-item></categories>
<marking><list-item>**List of associated marking codes**</list-item></marking>
<modifications><list-item>**List of associated modification codes**</list-item></modifications>

Stock count

https://jaguargift.com/en/xml/stock_count/
The /stock_count/ file contains information about the available quantities of particular products in stock for products in the /stock_items/ file.

LIST OF ALL ITEMS IN /stock_items/ FILE
<code>**Product code including color number**</code>
<count>**Product quantities in stock**</count>

Custom-made products

https://jaguargift.com/en/xml/made_to_order_items/
The /made_to_order_items/ file contains information about custom-made products, which is the reason why they do not have their stock file. The list of images in the /made_to_order_items/ file presents particular products in various colors. The color variations in one model are grouped. The codes of custom-made products in the /made_to_order_items/ file are shortened by the 'zz' color number (see Meaning of the product codes), and the available colors are listed in words. The /made_to_order_items/ contains a list of associated marking and modification codes, of which the information is included in /marking/ and /modifications/ files.

LIST OF ALL /made_to_order_items/ FILE ITEMS
<name>**Product name**</name>
<code>**Product code without the color number**</code>
<images><list-item>**List of product images in different shots and colors**</list-item></images>
<colors>**Offered product colors in words**</colors>
<price_pln>**Price in PLN**</price_pln>
<price_eur>**Price in EUR**</price_eur>
<hs_code>**Product customs code**</hs_code>
<size>**Product size**</size>
<minimal_order>**Minimal order**</minimal_order>
<materials>**Product material**</materials>
<features><list-item>**List of product features**</list-item></features>
<categories><list-item>**List of product's categories**</list-item></categories>
<marking><list-item> **List of associated marking codes** </list-item></marking>
<modifications><list-item> **List of associated modification codes** </list-item></modifications>

Modifications

https://jaguargift.com/en/xml/modifications/

The /modifications/ file contains information about all offered product modifications. The /stock_items/ and /made_to_order_items/ files contain a list of modification codes available for particular products.

LIST OF ALL /modifications/ FILE ITEMS
<name>**Modification name**</name>
<code>**Modification code**</code>
<price_pln>**Price in PLN**</price_pln>
<price_eur>**Price in EUR**</price_eur>
<images><list-item>**List of modification images**</list-item></images>

Marking

https://jaguargift.com/en/xml/marking/

The /marking/ file contains information about all offered marking methods. The /stock_items/ and the /made_to_order_items/ files contain a list of marking codes available for particular products.

LIST OF ALL /marking/ FILE ITEMS
<name>**Marking name**</name>
<code>**Marking code**</code>
<price_pln>**Price in PLN**</price_pln>
<price_eur>**Price in EUR**</price_eur>
<images><list-item>**List of marking images**</list-item></images>
<setup><list-item>**List of associated setup codes**</list-item></setup>

Marking setup

https://jaguargift.com/en/xml/setup/

The /setup/ file contains information about the setup costs necessary for the marking methods. The /marking/ file contains a list of setup codes required for particular marking methods.

List OF ALL /setup/ FILE ITEMS
<name>**Setup name**</name>
<code>**Setup code**</code>
<price_pln>**Price in PLN**</price_pln>
<price_eur>**Price in EUR**</price_eur>
